JANUARY.—January (Latin, *Januarius*) was so called by the Romans from Janus, one of their superior deities, to whom the first day of the year was sacred, and through whom they offered their prayers to the gods: hence the name is used to signify gate of the year. Janus was represented with two faces: one old and wrinkled, and looking backward; the other face young and smiling, and looking forward.

FEBRUARY.—February (Latin, *Februarius*) received its name from *Februa*, a feast of sacrifices and purifications held by the Romans in this month, in the vain hope of being cleansed from the sins of the whole year. It corresponds to *ADAR* (Ezra vi. 15), the sixth civil, and twelfth sacred month of the Jews. By the Saxons it was called *Sproutkele*, as cabbages begin to sprout now; and also *Sol-monath*, the month when pancakes were offered to Sol, or the sun.

MARCH.—March (Latin *Martius*) was so named by the Romans in honor of Mars, their god of war. In this month the Gothic tribes went out on warlike expeditions. It answers to NISAN or ABIB (Neh. ii 1; Deut. xvi 1), the seventh of the civil, and the first of the sacred year of the Jews. By the Saxons it was named *Hlyd-monath*, the loud or windy month.

JULY.—July (Latin, *Julius*) was originally called Quintilis, being the fifth month of the Roman calendar. Marc Antony designated it Julius, in honor of Caius Julius Cæsar, dictator of Rome, who was born in it, and who reformed the calendar. It answers to An, the eleventh month of the Jewish civil year, and the 5th of their sacred year.

OCTOBER.—October derives its name from the Latin word *octo*, "eight," indicating the place it held in the Roman calendar, and *imber*, or "shower." To the Jews it was known as *BUL*, signifying decay, as in the fall of the leaf (1 Kings vi. 38), or *MARCHESVAN*, as it was called after the captivity.

DESCRIPTION OF LIGHTS.

Fort Amherst Light, at the entrance of St John's—A Light was first established at this station in 1813, and until the granting of a Legislature to this Island the expenses consequent on its maintenance were defrayed by voluntary contributions; in 1850 a new House, Lantern and apparatus were erected. The Light burns at an elevation of 110 feet, is produced by a treble argand burner placed in the focus of an annular lens of the fourth order, and in favourable weather can be seen 12 miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during day light, to assist vessels in making the harbor

Cape Spear Light—This Light was first exhibited on the 1st September, 1836; it is produced by seven argand burners and silvered reflectors burning at an elevation of 275 feet - it revolves, shewing a Bright Light every minute, and in favourable weather can be seen 36 miles. It is situated in 47° 31' N lat. and 52° 33' W longitude

Harbor Grace Island Light—First exhibited on the 21st November, 1837; it is a fixed Light, has fifteen argand burners and reflectors, shewing a steady bright Light from N to SW and by W seaward, elevated above the level of the sea 151 feet, and can be seen in fair weather in rounding Cape St. Francis or crossing Conception Bay, on the intervening space between N. and S W. and by W; on the land side the light is more feeble. It is situated in lat 47 42 N, and in lon 53 05 W.

Cape Bonavista Light—Situated in lat. 48 42 N, lon. 52 59 W, is a Revolving Light, shewing alternately every two minutes a White and a Red Light. It is produced by sixteen argand burners and reflectors, burns at an elevation above the sea of 150 feet, and in favourable weather can be seen 30 miles. For some years the Light apparatus was in use at the Bell Rock, East coast of Scotland. By keeping this Light open with Cape Largent, it will carry you clear of the Flowers Rocks; first exhibited 11th September, 1843

Cape Pine Light—This tower is of iron, built by the Imperial Government in 1849-50, and first put in requisition on the 1st January 1851. It is revolving, and shews a bright flash every 30 seconds—has 12 argand burners and reflectors—elevated above the level of the sea 314 feet—situated in lat. 46 37 N, and in lon. 53 30 W. In a favourable state of the atmosphere it can be seen 36 miles

Harbor Grace Beach Beacon and Light—First exhibited 11th September, 1854; stands on the Point of Beach at the entrance of Harbor Grace. It is a double Light, as a distinction from Harbor Grace Island Light, one being placed above the other preserving that appearance for six miles; exceeding this distance up to ten miles, the two Lights appear blended into one. In sailing into Harbor Grace with a fair or leading wind, bring the Beach Beacon to bear W, or W. by S, and by keeping the Light or building a little on the starboard bow it will carry you clear of the Bar, on which at low water there is not more than 8 feet of water

Green Island Light, at the entrance of Catalina Harbor, Trinity Bay—Situated in lat. 48 30 N, lon. 53 03 W. This is a Fixed White Light, burns at an elevation of 92 feet above high water, exhibited every night from sunset to sunrise, and in favorable weather will be seen from E N E, seaward, to S W 12 miles. Vessels bound Northward by keeping this Light open with the North Head of Catalina until Bonavista Light opens with Cape Le Jean, will give the Flowers Rocks an ample berth—or when coming from the Northward and bound for Catalina, by giving the N Head a moderate berth, you will clear the Braudies Rocks by steering for Green Island Light

Cape Race Light—Exhibits a Fixed White Light, from sunset to sunrise. The Light will be visible to seaward from N E by E

round by the S E and South to West. The Light is elevated 180 feet above the mean water level of the sea, and may be seen in clear weather 17 miles from a ship's deck. The tower is striped red and white vertically. It stands close to the old Beacon, which has been cut down. The Lighthouse is in lat. $46^{\circ} 39' 12''$ N. lon. $53^{\circ} 2' 38''$ W. All bearings are Magnetic. Var. 24° W. N.B.—A Toll will be levied upon all Vessels benefiting by this Light.

THE PHENIX FIRE OFFICE

Is confidently recommended to the notice of the Public, for the liberality and promptitude with which all claims upon it are adjusted and paid—as well as for the almost unlimited security which it affords, comprising, in addition to the large invested Capital of the Company, the whole fortunes of a numerous Proprietary composed of some of the most opulent gentlemen and merchants in the United Kingdom.

The *Phoenix Office* has carried on an extensive and successful business for upwards of *Seventy-five Years*. The duty paid by it to Government for Insurances in Great Britain and Ireland exceeds £120,000 sterling per annum.

Annual and short time Insurances are undertaken by the *Phoenix Company*, on almost every description of risk in Newfoundland at moderate rates of premium, which may be known on application to the Agents at their Office in St. John's, where Policies are issued free of charge.

ADVANTAGES.

Policies Indisputable, except in cases of Fraud.

An ample Security Fund, in addition to the accumulation of Premiums.

No Personal Liability to the Assured.

Tables prepared as low as consistent with safety.

The WHOLE Profits divided amongst the Members.

The Premiums of Members Reduced every Three Years, or a Bonus added to the Policy, or a payment in Cash.

NON-FORFEITURE OF POLICIES—Assurers unable or who find it inconvenient to pay their premiums as they fall due, may obtain on application to the Board of Directors a Temporary Credit, or a New Policy will be granted of a smaller Amount, of an Equitable Value, without any further payments, and may also participate in the profits.

The Business of the Society embraces Assurances on Single Lives, Joint Lives, and Survivorships.

Endowments for Children. Sums of Money or Endowments payable to Children at the age of fourteen or twenty-one.

Assurance on the Lives of Children, from eight years of age.

Endowments for adults. Sums of money payable at the respective ages of fifty, fifty-five, sixty-five, or at death, if that event should happen before the time specified.

And all the Business or Risks contingent for human life or for terms certain.

Policies in this Society constitute an absolute security, as they cannot be affected by any act of the assured; for whether

the assured die by his own hands, or by the hands of Justice, or by duelling, in all cases of assignment to a bona fide creditor the Policy will be paid in full, or the extent of such interest.

Application for further particulars, and for effecting Assurance, to be made to

TO THE PUBLIC.

The undersigned feels that an apology is due to his Patrons and the Public, for the advanced period of the season in which *The NEWFOUNDLAND ALMANAC FOR 1858* is placed before them. He hopes, however, that for correctness and usefulness the present work will be found to be equal if not superior to preceding publications of a similar character.

The Compiler is indebted to his talented friend and countryman, *W. C. ST. JOHN, Esq.*, of Boston (late of Harbour Grace) for the *Astronomical Calculations*, and the high character that gentleman has justly acquired for scientific and literary attainments, will be a sufficient guarantee for their correctness. The undersigned also acknowledges his indebtedness to the Heads of Departments and other gentlemen, for their courtesies and the promptitude with which they furnished the information required.

JOSEPH WOODS,

St. John's, Nfld., December, 1857.
